The week in the stock market ended as it had begun, weak and disappointing, with prices sliding downward in the best securities and the worst, with heavy short sellthe week was even more unpleasant than the early days in that it was more active, both financially and physically. the early days in that it was more active, and the declines were greater. Two or three things in the business situation are especially worthy of comment. One of there is the continued increase in railway enrinings in June centraly to the persistent predictions of the tears, a d disaster likely to affect the business of the entire country. At least, that is the inference which must be drawn from the utterances and operations of the element referred to.

The railway enrings are personance and operations of the element persistent predictions of people generally optimistic. A material shortage in the spring wheat crop seems to be a certainty, but as everyone who takes an intelligent view of agricultural and commercial developments in this country knows, the shortage in the spring wheat crop is to a great extent offset by the larger yield of winter wheat, which is now practically assured. Moreover, higher prices for the cereal will compensate to a large extent for the small production.

As a rule, Wall Street discounts the furne heat short agency of exidence could be presented as a rule, which is now practically assured. The balance in favor of the increases were \$397.624. The decreases were \$23.327. The balance in favor of the increases were \$25.00. therefore, \$968,697, or 12.20 per cent. Important among the gains were thore of St. Paul, \$45,000; Mexican Central, \$72,000; Norfolk and Western, \$61,000, and Northern Pacific \$87,202.

Another most significant showing is that made during the week by the Tennessee Coal and Iron Company for May, and an unofficial statement regarding the May business of the American Steel and Wire which, in the case of man, and the facts.

If the pacification of the Chinese Empire is accomplished by the concerted action of the powers, as seems probable, the month, after all fixed charges, was backering on the Pacific Coast will \$227,000. From January 1 the increase in the curplus of the company was \$1,171,500. States bordering on the Pacific Coast will obviously enjoy a large increase in their foreign trade. While upon the subject of international complications, it should be noted that the virtual termination of the South African war has temporarily been relegated to a subordinate place in current history, both here and abroad.

The prominent feature of the speculation on the stock exchange this week has been Brooklyn Rapid Transit, which has sustained a net lock of over 16 points, the greater part of it yesterday and today. This movement has naturally revived all the rumors adverse to the company that were current while the decline in the stock from nearly three times the present.

\$237,600. From January 1 the increase in the surplus of the company was \$1,171,500. The net earnings of the company for the first five months of the year were sufficient to pay the full 8 per cent dividends in both the preferred and the commen stocks for six months and to leave in excess \$422,000. Or, in other words, while the talk of the bears is of ruin to the iron and steel trade, of no husiness, and process being cut below the profit limit it is shown that the Tennessee Coal and Iren Company is earning at the rate of a million dollars a year in excess of its dividend requirements.

campaign against the stock is for the purpose of securing control, in accordance with the Wall Street theory that the Metropolitan Street Railway Company desires to eventually manage the entire local traction system of Greater New York.

This view, though purely conjectural, revives recollections of what occurred in the market for Third Avenue stock after the Metropolitan Street Railway secured.

The bank statement yesterday was "unfavorable." It was not as good a showing as had been expected. It is to be doubted, however, if it had much effect on the market, as traders were taken up with other ket, as traders were taken up with other ideas when it appeared. As a master of fact, too, the financial world is not nuch exercised over the money outlook. The sterling exchange rate declined 7-3 during the week, and engagements for the shipment of gold vesterday were given up. The forces of the diagrams of the strangel was as follows: figures of the statement were as follows:

Curiously enough, the stock which has shown the most weakness, the worst lack of support, during the past three days is Brooklyn Rapid Transit, a security which intrinsically should be least affected by the bearish news in general, the trouble in China, and the high price of wheat. Since Thursday B. R. T. has been sold short and liquidated by the many thou-sands of shares for an apparently endless stream of orders. It has tumbled 15 points in a few days and more than 20 points in 'he past three weeks. Yesterday it went off to 51 and a fraction "with a weakness which was almost pathetic." It is said that one of the chief holders of the stock has been forced to liquidate. There has also been selling of stock involved in the Price. McCormick & Co failure. The shorts at tacked it early in the week because it had not declined previous to that time with the remainder of the market. They persisted in their attack later because of the decision of Judge Dickey that the 10cent fare to Coney Island is illegal. Yes-terday they continued to sell because of a cheap story that the Brooklyn Heights Railway was to lose its charter, owing to an infringement in charging the 10-cent ing and a general feeling that the worst has not yet been recorded. The ending of fare. As a matter of fact, the Brooklyn

Pacific Mail has been strong all the week, though there has been some decline since Wednesday and Thursday. The buil arguments regarding Mail are that the company is earning a dividend of 3 per cent, and that its business is likely to be greatly increased by the Chinese trouble if it becomes much more seute. The Local Security Market. Summer duliness has attacked the local business situation. Many of the prominent business men, and many purchasers as well, have already left the city, and those eserves decreased \$1,971,000 who remain seem little inclined to buy sans increased \$25,880 either real estate or stocks and bonds. The serie decreased \$1,991,993 activity of a week or two ago in the local stock market has departed entirely, and the transactions each day are small and insignificant. Prices are off several points from the best recently in many securities, but there has not been the decline here that there has in New York. This leads many to believe that further recessions are likely, but on the other hand it is pointed out that stocks are more closely held in Washington and less easily affected by general conditions.

Compared with a table of prices in the New York market three weeks ago and yesterday, printed elsewhere, the following prices in the local market for the same dates may be interesting. The bank stocks are omitted from the list. Prices are unchanged except in the case of Traders', in which there has been an advance of 5 points in the bid price, from 125 to 130 in the three weeks. The level is also little changed in the trust company securities, Loan and Trust only having declined 5 points in the bid price. The bid prices are the ones given in each case;

The most significant declines recently The most significant declines recently have been perhaps in the insurance stocks. These undoubtedly are due to the fight in the local insurance situation. ence of Northwestern buying. Tonight's prices are up Ic over Friday's, and almost 3c this week. The losses of hay and oats and grass in the Northwest are the main outside influences, sympathy with wheat being the chief speculative factor. Clearances today were over 400,060 bushels. Provisions opened excited and much

Provisions opened excited and much higher, the early buying being a wild scramble by shorts, who found offerings very light until a big advance had been cored. Profit taking on a large scale by longs and liberal offerings from packers resulted in a sharp reaction. The closing was steady. There was an excellent investment demand. Speculation has taken hold of this market. hold of this market.
